*A complete range of professional floor cleaning machines.*

Edition - 2026

[www.comacindia.com](http://www.comacindia.com)

*professional people*

It all started in 1974 by visionary insight of Giancarlo Ruffo in a small warehouse, in S a n G i o v a n n i

Lupatoto, in the province of Verona, where the first models of floor care machines were hand-crafted. With the cleaning segment still at its infancy, futuristic products from COMAC (Acronym for construction machinery) created a "niche" in the European Market. With a prime strategy of providing the best quality products to its users and tagging itself with "professional people" COMAC advanced in every segment of the cleaning industry with its innovative and technologically advanced products. Advancing itself from floor care products such as walk behind and ride on Scrubber Dryers, its product portfolio added industrial vacuums and the sweeper range too.

2003-04 saw the emergence of COMAC as a "group of companies" with the merger of Comac, Fimap, Tmb and Ruffo. A new "network of companies" - both vibrant and vital - united by a common philosophy oriented to professional cleaning services was formally created, capable of putting together a strong heritage of experience, entrepreneurship and innovative willingness.

New design, optimisation of volumes, silence and ease of use became must for the development of Comac products. In an increasingly demanding market, the company continues to invest on new projects in order to renew the entire line of scrubbing machines with an aim to reduce

costs and consumption while respecting mankind and environment. Comac introduced its products to the Indian market two decades ago and since then they have been present in every commercial and industrial segment of the country. You will find COMAC cleaning machines in many International Airports of the country, Railway & Metro stations, major core industries, Automobile Plants, Hospitality Chains, Corporate Offices etc keeping their premises clean and hygienic.

2024 was an important year in the Comac's history: we celebrated our first 50 years of activity. Half a century during which we have built a solid corporate identity based on innovation, social commitment and environmental awareness. We have not experienced this milestone as a point of arrival, but as a drive towards the future, driven by the desire to continue growing in a responsible and sustainable way. We believe that the future is built together, through the daily commitment of all the people who are part of our company: to them, and to all stakeholders who accompany us on this path, we extend our heartfelt thanks.

COMAC India has been formed to provide greater commitment of the Comac group towards Indian market and we play an active part in shaping the future of India as a CLEAN GREEN nation. Comac India has rapidly grown and has already assumed leadership in professional cleaning market, boasting of 15 branch offices across India, manned with highly trained hygiene consultants, vast service footprint as well as offering various commercial options for mechanization to Indian industry.

# JOURNEY OF EVOLUTION IN 50 YEARS OF EXCELLENCE

## 1974

Comac (short for Costruzione Macchine), is founded by Giancarlo Ruffo and Domenico Accadia. Comac begins to produce its first floor scrubbers by hand: Lavait 400 and Lavait 500.

## 2007

Comec strengthens its positioning in foreign markets, opening the Comac Shanghai branch. In the same year, Comac wins the innovation award at the "Pulire" fair.

## 2019

The "Non Stop Cleaning" project evolves into #comac4water, reflecting Comac's commitment to water preservation.

## 1981

Comac exhibits at Issa InterClean (Amsterdam), the industry's most important international fair, for the first time.

## 2009

The project for recycling water used by Comac floor cleaners is launched, subsequently called "Non Stop Cleaning".

## 2020

Despite the challenges posed by the pandemic, Comac strengthens its presence in Europe by opening the Comac Iberia subsidiary.

## 1984

The first headquarters is purchased in Via Ca' Nova Zampieri, in San Giovanni Lupatoto.

## 2010

As it continues to expand, Comac relocates its headquarters to a new facility built on a 23,000 squaremetre block of land, in the province of Verona.

## 2020

Voluntarily adhering to ISO 14067, Comac develops and certifies the Carbon Footprint Systematic Approach (CFP-SA) model for calculating the carbon footprint of its products.

## 1985

Comac, already a well-established company in the Italian and European markets, becomes a joint-stock company.

## 2015

Comac France is established, a key subsidiary to stay close to French customers.

## 2021

On a voluntary basis, Comac obtains SA8000 certification for corporate social responsibility.

## 1992

The German multinational Henkel (later Ecolab) joins Comac S.p.A. as the third partner.

## 2015

Comac Fleet Care (CFC) is the first system allowing remote management of a fleet of cleaning machines, collecting data to make cleaning operations more efficient.

## 2022

Comac launches SELF.Y, the independent floor scrubber

## 1996

Comac S.p.A. obtains its first ISO certification for the design and construction of electromagnetic machines, ensuring respect for people, the environment and compliance with current quality regulations.

## 2016

Comac continues its global expansion, founding the Comac India subsidiary.

## 2024

Comac turns 50.

## 2003

A team of experts is put together from each of the Ruffo family companies: Comac, Fimap, TMB, Ruffo and Cofirent.

# Our technologies

## COMAC'S GUIDING VALUES

- ☉ **PEOPLE** : the true beating heart of Comac: our team, customers, suppliers and all partners are the driving force of our development. We promote a culture oriented towards merit, the enhancement of skills and respect for diversity and inclusion in every business environment.
- ☉ **FAMILY** : deeply rooted in its history & is reflected in relationships based on trust, transparency and collaboration with all stakeholders.
- ☉ **COMMITMENT** : to customers is every Comac product is born from listening to the real needs of end users, in the belief that the most effective technology is one that combines innovation and simplicity of use.
- ☉ **QUALITY** : and technological excellence. We invest with determination in research and development, to design cutting-edge solutions that improve the effectiveness of cleaning operations and contribute to the well-being of people.
- ☉ **RESPONSIBILITY** : is inspired by criteria of environmental responsibility and health protection, with concrete actions to reduce emissions, contain waste and ensure proper waste management.
- ☉ **LOYALTY** : acts in compliance with solid ethical principles, conducting every activity with honesty, integrity and fairness towards customers, suppliers and all those with whom it interacts.

## Walk-behind Scrubber Dryers

**Vispa 35 E/B**

Perfect to replace manual cleaning systems in small and congested areas. Ideal for maintenance cleaning operations of area upto 1050 m<sup>2</sup>/hr

**L 20 E/B**

L20 B-E is a walk-behind scrubbing machine available in electric or battery versions, with 1 disc brush of 51 cm working width.

**Abila 50 E/B**

Highly maneuverable scrubbing machine with 50 cms width. Compact in size and modular in construction. Area performance up to 1750 m<sup>2</sup>/hr.

**Antea 50 E/B**

Antea is a heavy duty cleaning of floors up to 2200 sq.m. It is available with a disc brush with 50 cm working width. Moreover, they come with traction also; the scrubbing-sweeping version with 2 cylindrical brushes (BTS) and the new orbital version (BTO).

## Ride on Scrubber Dryers

**Agila 50 E/B**

The Comac Agila 50/50 B scrubbing machine is ideal for rooms up to 5000 sq.m. It is designed for both regular and general cleaning of crowded premises: shops, car repair shops, fitness centers, shopping centers, offices, car services, educational and health care institutions, industrial premises. The liquid suction system ensures high quality of work and leaves the floor dry and without streaks.

**ESCAMAX 510**

The ESCAMAX PRO escalator cleaning machine has escalator cleaning components with integrated water spraying and brushing. This truly solve the problem of washing escalators. It is a special cleaning machine for electric escalators, electric step ladders, electric slope ladders and plane conveyors.

**Innova 22/55**

Battery operated compact ride-on scrubbing machine which replaces a traditional walk behind scrubbing machine in maintenance cleaning of surfaces up to 3,000 m<sup>2</sup>/hr.

**Innova Comfort M**

Using the Innova Comfort 85 M is suitable for working in areas characterized by the passage of a high number of people such as the public sector, educational establishments, swimming pools and supermarkets. The squeegee and the brush head are controlled by two independent levers for very simple and immediate use making it a super affordable and durable option.

**Innova 85B/100 B**

One of the safest, productive & user friendly Scrubbing machines with a working width of 85 cm. Area performance up to 5100 m<sup>2</sup>/hr. This has fully automated Brush and Squeegee functions.

**Optima 85 B**

Battery operated scrubbing machine with a robust design, suitable for working in different environments, both commercial and industrial. Attains productivity of 5525 m<sup>2</sup>/hr. This s powered by a robust 24V 240 AH Traction battery.

**C 85/C 100**

The robust and powerful heavy duty scrubber drier suitable for working in different environments, both commercial and industrial. Working width of 85/100 cm. Area of performance up to 5100/6000 m<sup>2</sup>/hr

## Sweepers

**C 130 BS/D/Bi-Fuel**

The robust diesel engine or battery powered heavy duty scrubber drier. Four disc brushes to effectively scrub the floor and one cylindrical brush to convey dirt into the removable hopper. Area of performance up to 7800 m<sup>2</sup>/hr

**CS 65 A**

Compact walk behind, extremely maneuverable sweeper for cleaning of small to medium sized area for indoor & outdoor use. Productivity of 1500 m<sup>2</sup>/hr. Robust body with rust free powder coated steel frame and hopper.

**CS 500**

CS500 is a small walk-behind sweeping machine; it is practical and compact yet powerful and precise when cleaning surfaces. This small battery-powered sweeper simplifies cleaning operations, courtesy of its excellent performance levels which enable the productivity of those who use it to be increased. Suitable for cleaning both indoor and outdoor surfaces measuring up to 2600 sq.m.

**CS 60 B/Hybrid**

CS60 is compact and battery powered ride-on sweeping machine. Rear loading system suitable for removing dust and solid dirt on any type of floor and has a performance capacity of 4250 m<sup>2</sup>/h. Hopper Capacity-65 L

**CS 700 B/H**

Highly reliable & cost effective battery-powered or engine operated sweeping machine. Large filter surface area-5 m<sup>2</sup>. Debris hopper capacity-90Ltr. Productivity up to-6300 m<sup>2</sup>/hr.

**CS 80/110/120 D/B**

Heavy duty sweepers suitable for cleaning of big surfaces or narrow and cluttered up areas, thanks to the box frame built around the central brush which is very compact but also extremely strong. Sweeping width: 80/110/120 cm

## Integrated Sweeper

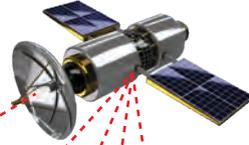

**HP 4000**

HP4000 combines the performance of two machines in one single particularly compact machine, thus providing two actions in one solution and ensuring maximum quality results. Roads, parking lots and large squares are currently cleaned using mechanical or suction collection machines. These two systems are suitable for different types of cleaning: mechanical machines are more suitable for heavier waste and suction machines are more suitable for lighter waste, therefore selection of one or the other inevitably entails a compromise in terms of the resulting quality.

**HP 6000**

HP6000 is a high performance street sweeper which combines in one single machine the performance of two, thus ensuring maximum quality results. Roads, parking lots and large squares are currently cleaned using mechanical or suction collection machines. These two systems are suitable for different types of cleaning: mechanical machines are more suitable for heavier waste and suction machines are more suitable for lighter waste, therefore selection of one or the other inevitably entails a compromise in terms of the resulting quality.

CFC or Comac Fleet Care is fleet management system by comac which helps you manage your machines at different sites, even remotely located, with web portal service enabling improvement in professional effectiveness and business productivity. CFC collects all machine data and processes them into useful information, that will help to get the best from the fleet, saving time and money. The complete overview of all machines is available on a single web portal accessible 24/7 on any device

CFC can tell you at once everything you need to know about your machines:

- Where they are
- What task they are performing
- Who is carrying out the cleaning duty
- Days and times of use
- Downtimes
- Issues
- Service history
- Next scheduled service

## Commercial Dry Vacuums

**Top A 11 D**

Dry vacuum cleaner with 22 L capacity. Ergonomic design and sturdy body. Triple Filtration System.

**Backpack**

Back-pack vacuum to clean areas where Conventional vacuum cleaner cannot be used. Equipped with 4 filters with 4 L dust bag capacity. Conventional tool belt to carry all accessories.

**CUV 15DM**

Professional upright vacuum cleaner with working width of 38 cm and 4.5 L dust bag capacity. Excellent stability and maneuverability. Adjustable brush height.

**Extract P 25**

A very powerful, multifunctional & versatile injection and extraction machine. Can also be used for wet & dry vacuuming. High capacity tank of 25 L & detergent capacity of 8 L.

## Commercial Wet & Dry Vacuums

**Carpet**

Ideal machine for washing tapestries and carpets which uses the exclusive foam suction system and high-efficiency suction system. Detergent tank of 18 L and detachable recovery tank of 20 L.

**CA 11 WD**

Sturdy and reliable wet and dry vacuum Cleaners with 20 L tank. Excellent suction capacity. SSC body for usage endurance. Wide range of accessories for various applications.

**CA 27 WD**

Sturdy and reliable wet and dry vacuum Cleaners with 35 L tank. Excellent suction capacity. SSC body for usage endurance. Wide range of accessories for various applications.

**CWD30 Pro**

Single phase vacuum cleaners for picking dust & liquid, having high degree of sturdiness and mobility. Performance is ensured, thanks to the twin top performing motors.

## Industrial Vacuum Cleaners

**CA 58.3 WDB / ZW70 Pro**

Sturdy and reliable wet and dry vacuum Cleaners with 77 L tank. Performance is ensured with twin top motors. Wide range of accessories for various applications

**Pro P58 WD Battery**

Battery-powered wet & dry vacuum cleaner with high degree of sturdiness and mobility. Can deliver up to 1.5 hours of operation.

**Pro Shaker/TNG 55**

Powerful and versatile single phase DRY vacuum cleaner with a 50 L tank capacity for specific light to medium duty dust/debris pick up. Ergonomic design. Filter of 1.3 Sq mtr area. Power: 3000 W

**CA 2.40 VAC/2PS\***

Powerful & versatile single phase vacuum cleaner for medium to heavy duty use. Dual motor. Excellent suction. Heavy duty construction frame. High airflow. Large filter surface area: 1.95 m<sup>2</sup>. Power: 2200W

**CA 3.100 VAC/3L\***

Powerful & versatile single phase vacuum cleaner for medium to heavy duty use. Dual motor. Excellent suction. Heavy duty construction frame. High airflow. Large filter surface area: 1.95 m<sup>2</sup>. Power: 3300W

**CA30 ON.100/TO 30L\***

A Powerful Industrial vacuum cleaner with a strong frame, for heavy operations. With a **single phase** turbine, its usable for wet & dry applications. Large filter surface area: 1.95 sq.mtr. Power: 2200 W.

**CA 40 ON.100/TO 40L\***

An industrial vacuum cleaner with a strong frame, for heavy operations. With a **three phase** turbine it's usable for wet & dry applications. Large filter surface area: 1.95 sq.mtr. Power: 2900 W.

**CA2.120 OIL/CA 120 OIL/  
OIL 2XL\*, OIL 40XL\***

Heavy duty vacuum cleaner, specifically designed to recover oil, swarf and chemical water. It can separate solids from the liquids. Equipped with 120ltr tank, electronic float, nylon filter.

**CA 30SS Turbo VAC/Cube 40\***

Powerful three phase industrial vacuum cleaner for applications requiring frequent movements in reduced spaces. Reliable and designed for continuous heavy duty use. Large filter surface area: 1.3 sq.mtr. Power: 2900 W.

**CA T60 TSP VAC**

Powerful three phase industrial vacuum cleaner for applications requiring high degree of suction like picking up fine dust particles i.e. cement which tends to clog filter in very short time. Standard cartridge filter. Pneumatic filter shaker. Power: 2900 W

**CA 75 3 PHASE/TEC 75P\***

A very powerful three phase vacuum cleaner with the turbine installed in a rear compartment. Suitable for wet & dry applications. Sturdy frame that makes it remarkably solid. Filter surface area: 1.95 sq.mtr. Power: 5500 W

**AT22-30M**

Compressed-air vacuum cleaners that can be used where power supply is either not available or not advisable (potentially explosive zones) and thus ensuring utmost safety. They are characterised by an excellent vacuum and good air flow.

**CA ATEX 22-40L**

Atex certified vacuum for use in areas where the maximum operating safety is required. Designed to work on dust in potentially explosive areas classified as Zone 22. Filter surface area: 1.95 sq.mtr. Power: 2900 W

### Single Disc Scrubbers

**Mini 33**

A compact scrubber with 33 cm working width for congested areas. With low working height it can clean under furniture etc. Easy to use and safe. Adjustable handle with grip. Easy to transport.

**CM 43**

A powerful scrubber with 43 cm working width for regular applications. The gear box drive ensures its reliability. Controlled weight distribution for good balance while in use. Large solution tank of 15 ltrs.

**CSD 43 Pro**

Multipurpose & versatile machines for floor maintenance operations, carpet shampooing and floor polishing. Clutch type motors for longer working life.

**L43DS**

A professional, belt-driven, SD machine which is ideal for efficient and cost-effective maintenance of floors. Its dual-speed disc excels at cleaning & maintenance operations.

**Mega 50+**

Single disc machine with gear-box drive, very effective in specific treatments. Has more than 50cm working width. Powerful and heavy-duty motor (2.4Hp). Controlled weight distribution for good balance.

### Orbital Single Disc

**UHS 1500**

UHS 1500 is a single disc machine suitable for burnishing of floor post polishing. Exceptional balancing system. Special transportation wheels. Quiet operation. Working width of 500 mm.

**TOR 43**

A new Compact single disc machine recommended for heavy duty works. It has an orbital movement that enhances the performances of a regular single disc machine.

### Steam Cleaners

**Diamant Inox**

Professional steam generator with rugged steel body, practical handle and pivoting wheel. Broad range of patented standard accessories. Continuous refill.

**VC 6000**

Compact, handy, powerful "extraction cleaning" with steam. It allows you to automatically add the detergent during the cleaning phase. Equipped with a vacuum cleaner for suction.

## High Pressure Cleaners

**KLS 1680 Gold Plus**

The KLS 1680 is a cold pressure washer with compact dimensions but that is high performing. It is also easy to handle and transport. The induction motor that the KLS 1680 is equipped with makes it a professional high - pressure washer. The KLS 1680 is the ideal pressure washer for cleaning walls, floors, stairs and outdoor areas.

**K 200**

K 200 is a high-pressure cleaner that is easy to use and move thanks to the ergonomic handle and its rubber wheels. Developed in a vertical position to be practical and maneuverable, the K 200 can also be stored horizontally to make it even more handy.

**C20K EM**

The CI C20 EM trolley cold pressure washer stands out for being compact and robust. Equipped with a trolley that has a robust, resistant structure thanks to its large back wheels with rubber treads and a practical aluminum handle, the CI C20 EM is solid but also agile and easy to move.

**K 250**

Three phase powerful high pressure washers with 150/210 bar pressure suitable for heavy duty applications. Sturdy injection-moulded plastic casing. Handy lance and gun storage. Handle with supports for the power cable and delivery hose Easy maintenance by simply removing the front casing.

**CI C30 EM**

The CI C30 EM is a trolley cold pressure washer designed to be compact yet robust. it is a professional powerwasher capable of offering the perfect combination of performance, user-friendliness and easy maintenance. The CI C30 EM's robust metal trolley and two large wheels with rubber treads make it a solid high-pressure washer that is still easy to move.

**CI C25K EM**

The CI C25K EM trolley cold pressure washer stands out for being compact and robust. Equipped with a trolley that has a robust, resistant structure thanks to its large back wheels with rubber treads and a practical aluminum handle, the CI C25K EM is solid but also agile and easy to move.

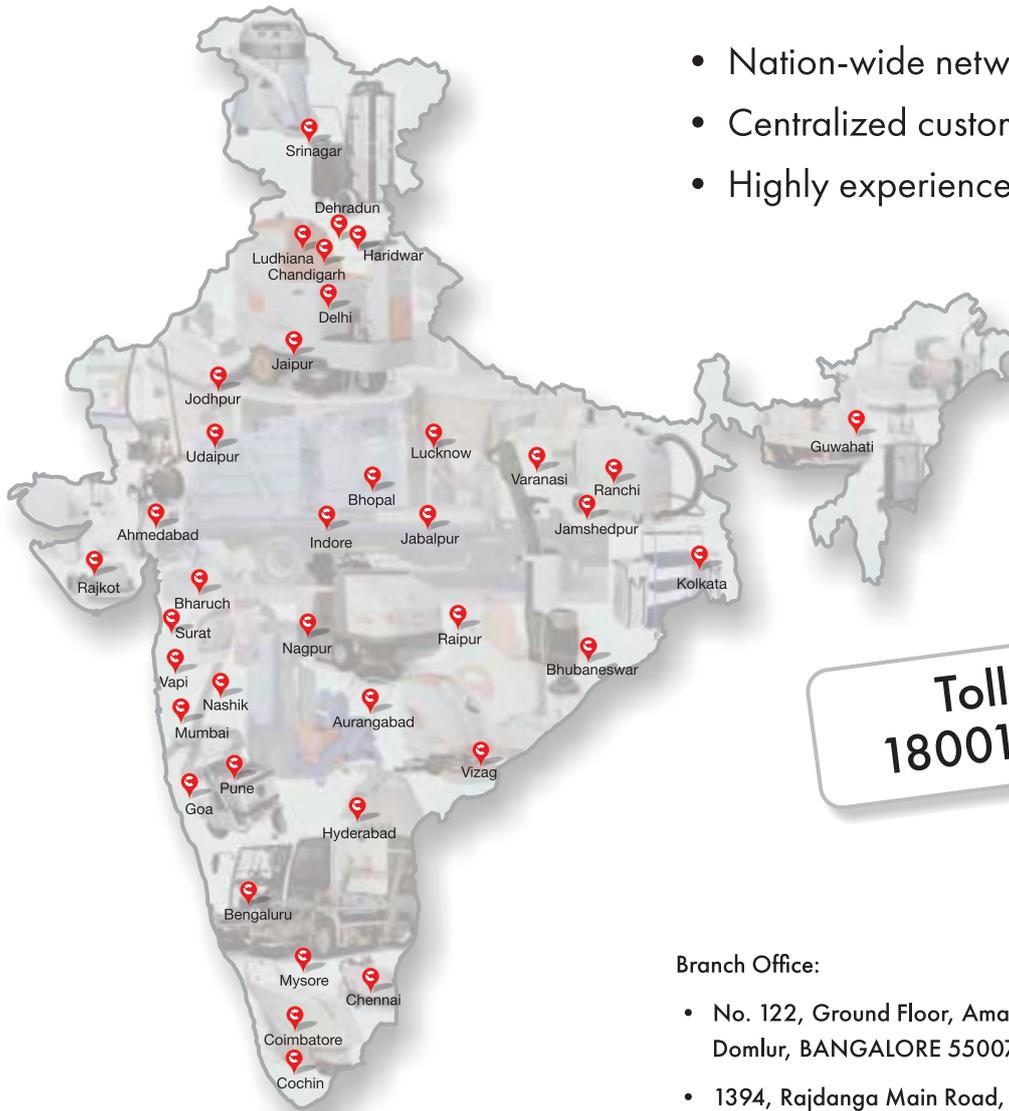

**CI H10**

CI H10 is a professional hot water pressure washer equipped with a single-phase electric motor able to guarantee excellent performance in the most difficult environments. Equipped with a solid and robust structure, this high-pressure machine has been designed for professional use. But the CI H10 is also very compact and manoeuvrable thanks to the two rear wheels with rubber tread and the pivoting front wheel.

**CI H30**

The professional hot water pressure washer CI H30 is equipped with a three-phase electric motor to ensure excellent performance even in the most difficult environments. Characterized by a compact, solid and robust structure, it is a high pressure machine perfect for professional and intensive use. The two rear wheels with rubber tread and the pivoting front wheel also make the CI H30 very manoeuvrable.
