Anti-collision sensor

Maximum safety and zero worries for the operator

To further increase the safety of Comac floor scrubbers, an anti-collision sensor can be installed on the rear of larger ride-on models.

The anti-collision sensor enables **any obstacles to be detected** while the operator is comfortably in the driving position. The detection of the presence of any obstacles is an excellent means of support for the prevention of accidents when using the floor scrubbers.

BENEFITS

- Prevention of any accidents that could occur during the use of floor scrubbers
- Protection of the operator and any people who may be in the vicinity of the floor scrubber
- Reduced operator effort, enabling him or her to work safely without having to worry about potential obstacles
