Stop
Go &

Stop&Go

The system for making cleaning operations more economical, optimizing consumption and reducing emissions

When the machine is temporarily idle, the functions are interrupted automatically. In floor scrubbers, for example, the solution flow is interrupted and the brushes are halted. Furthermore, on automatic machines, the brush head is lifted off the floor with no need for operator intervention.

THANKS TO STOP&GO, CONSUMPTION IS OPTIMIZED AND WASTE REDUCED. PRESSING THE FORWARD MOVEMENT PEDAL OR LEVERS RESTORES THE FUNCTIONS THAT WERE ACTIVE PREVIOUSLY.

BENEFITS

- Consumption optimization
- Reduced costs and emissions
